

Spring 2026 Attitudes Intake Survey

Version 1 · Page 1 of 2

Earlier this semester, you rated your agreement with each statement on a 1–5 scale. (Strongly Disagree to Strongly Agree)

1. I am morally obligated to follow the law, even if I do not agree with it.
2. There is a good chance that human society will collapse as a result of climate change.
3. I am generally optimistic about the collective future of Chicago.
4. In making public policy decisions involving technology, we should rely mostly on the advice of experts.
5. The social impact of a company will be a factor in my decisions about where to work.
6. I am generally optimistic about the collective future of Illinois.
7. Most people are socially responsible most of the time.
8. There's a good chance that human society will collapse from a human-made disaster (nuclear war, biotech accident, etc.).
9. It is morally acceptable to buy from technology companies that exploit poor workers.
10. I am generally optimistic about the collective future of the United States.
11. It is morally acceptable to work at a laboratory that designs, modifies, and/or tests nuclear weapons.
12. I am generally optimistic about the collective future of UIC.
13. Major aspects of my moral perspective are unlikely to change at this point in time.
14. The work of an engineer / computer scientist is inherently political.
15. I know what kind of work I want to do after I graduate.
16. It is morally acceptable to eat beef, regardless of how it was farmed.

17. Most decisions made by humans can be automated
18. Technologically-created problems can usually be addressed with technological solutions.
19. I am generally optimistic about the collective future of humanity.
20. It is morally acceptable to work on oil-field technology for BP, Chevron, Exxon, or similar companies.
21. Computing itself is value-neutral: it is what people do with the computing that is right/wrong.
22. It is morally acceptable to develop software for the guidance system of a "smart bomb" for the military.
23. There is no "right" or "wrong" in this world; everything is relative to cultural norms and/or personal belief.
24. It is impossible to accurately predict how a technology will be used, so it makes little sense to try.
25. Most skills taught in the Computer Science major have been (or will be) automated
26. Technology is driven primarily by human desires, as expressed through the economic marketplace.
27. Education can improve someone's moral/ethical decision-making.
28. Ethical decision-making can be automated
29. I am generally optimistic about my future.
30. It's important to me that my daily actions have a positive influence on the state of the world.
31. Computing has vastly improved the quality of most people's lives.
32. Because of technological advances, I will probably live longer than my parents.
